DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-9, drawn to a composite article per se, classified in class 428.

The preamble of "for use in an aircraft brake heat pack" in each of claims 1 and 6 carries no patentable weight. Should claims 1 and 6 be changed to positively recite the brake in both the preamble and body of the claims, the claims will be included with Group III for examination.

II. Claims 10-14, drawn to a method of forming a composite article, classified in Class 156 or 427.

III. **Claim 15, drawn to brake discs classified in Class 188.**

The inventions are independent and distinct with different classifications and different fields of search for the groups due to the different technologies involved.

Restriction for examination purposes as indicated is proper.

Note the examiner currently examining this application is assigned to the docket of Group III. Should applicants elect either one of Groups I or II, the examiner will transfer the application to the TC handling the elected invention. Applicant should note that those examiners may require further restriction and/or election.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
